

Important Instructions!

SUPER COOL PVA SPONGE PRODUCTS

Including: PVA Sponge, Wipes, and Shammy

BEFORE INITIAL USE

- **Wash or rinse out thoroughly in warm water. The product is packed with an anti-mildew and anti-mold solution that should be rinsed out.**
- **If dry or stuck together, do not peel apart! Soak for about 5 – 10 minutes in warm water (longer if in cold water or DI water). If possible, wash with normal laundry – products will come out perfectly hydrated!**
- **Store the clean, wet PVA sponge in its plastic container or a zip bag. PVA sponge becomes hard when dry. Simply rewet and it comes to life!**
- **Material may be cut into smaller pieces with a sharp pair of scissors.**
- **For extended periods of time, store in dry form or leave cap off container.**

PROPER CARE OF PRODUCT

- **Machine or hand wash with liquid detergent and/or ammonia – avoid powder detergent or bleach.**
- **Do not dry in dryer (product is used wet – drying doesn't hurt but is meaningless).**
- **PVA sponge is not affected by mold, mildew, or odor. If PVA sponge or PVA towel has mold or mildew (brown, black, or green spots), wash in liquid detergent and ammonia. If mold or mildew is still evident, soak in a 5:1 solution (5 parts water for 1 part liquid bleach) for about 5 minutes. NOTE: Color of product may fade due to bleach. Test for fastness!**
- **PVA products work even better after washing several times.**

NOTE: Super Cool Products does not make any guarantee for PVA sponge products improperly used.
